

**Performance
Plus Profit.**

TURBO

TM

Sega/Grain's newest driving game, TURBO, offers high speed performance for players and high earning profit for you.

Turbo gives players a brand new perspective of racing. No more back seat driving! Turbo's true to life 3-dimensional perspective puts players right in the driver's seat, whirling through city streets and tunnels, over highways and bridges.

Two of a kind

TURBO

SEGA/Gremlin

Revers off to a good start.

Turbo screaming towards the country.

Tunnel vision raceway.

Rural routing.

Concluding extended play victory lap.

The aerodynamic Turbo cockpit is fully equipped with an L.E.D. instrument panel that maps acceleration, indicates the top five scores to beat, score of the last game played, and measures record breaking speeds. Standard features include a pop tally scoring wheel, responsive 2-speed gear stick shift, illuminated oil and temperature gauges and a full power accelerator, all in the realistic cockpit of a turbo charged race car.

Turbo is also available in the compact upright, with score indicator, gauges, steering wheel, stick shift and accelerator for maximum space efficiency.

Both models offer behind-the-wheel excitement in a grueling cross country race. Road handling skills are put to the test as the Turbo course winds through busy city streets, narrow suspension bridges, blind tunnels and rambling country roads.

Unexpected changes in road conditions such as snow, slickness, competitors and emergency routed ambulances further challenge player's driving abilities.

No pit stops are permitted in this fast-paced race to the finish. Points are accumulated as Turbo successfully routes through each phase of the course, lapping other cars. Drivers can monitor their progress at a glance with read outs for time remaining on the clock and number of cars passed, at the top of the screen.

Collision during the first lap sends drivers back to the starting line. In succeeding laps however, a collision explodes the Turbo car on impact. Drivers run a high risk of collision when approaching a hill at top speed. The crest of the hill blocks driver's view from fast oncoming vehicles. Drivers are advised to check their speed and exercise caution while climbing steep hills.

An extended play victory lap is awarded when drivers pass 30 cars with time to spare. Lapping cars during this phase

locks on bonus points.

Turbo can be your high income pacemaker. Visit your local Sega/Gremlin distributor today and test drive a TURBO.
